

DreamLearn

E-Learning Website Audit & Digital Marketing Implementation

Unified Mentor Capstone Project

Prepared by: S. Umayal

Program: Digital Marketing

Organisation: Unified Mentor

Date: April - September 2026

Project Overview

DreamLearn is a WordPress-based e-learning platform offering courses in digital design and marketing disciplines. This project delivers a full audit of the site and a digital marketing strategy to grow its visibility and conversions.

Objectives

- Consolidate a full website audit across content, technical, and search dimensions
- Propose a prioritized redesign plan
- Build an SEO, content, paid ads, and social media strategy
- Implement quick wins and set up analytics tracking

Site Structure — 5 Pages

●	Home	Highest search visibility (8 impressions)
●	About	Highest on-page SEO score (9/10)
●	Courses	Core conversion page — 4 course tracks
●	Blog	Content engine — being built out
●	Contact	Confirmed functional form

Consolidated Audit Summary

Strong (8–9/10)

Content / On-Page SEO

Gaps: no outbound links; Courses & Blog CTAs not linked to real pages

Excellent, fixable bugs

Technical / Performance

Lighthouse 96–100; a 403 error on Home; recurring accessibility gaps

Minimal / not established

Off-Page / Authority

Expected for a new site — addressed as a forward-looking action

Early stage

Search Visibility (GSC)

All 5 pages indexed; 15 impressions, 0 clicks, avg. position 7.3

Technical Audit — Lighthouse Scores

Key Findings

- Sub-1s load times sitewide — site is fast, not slow
- Home page throws a 403 resource error on load
- Color contrast issues recur on all 3 pages tested
- Accessibility tree not well-formed (ARIA/markup)
- Minor: unused CSS/JS, render-blocking requests

Redesign Recommendations

High Priority

- Link Courses “Learn More” buttons to real course pages
- Publish real Blog posts behind existing article cards
- Fix the Home page 403 resource error
- Fix color-contrast accessibility issues

Medium Priority

- Add outbound links to credible external sources
- Fix heading order; add semantic <main> landmark
- Add trust signals: testimonials, instructor credentials

Lower / Ongoing

- Trim unused CSS/JS, render-blocking requests
- Monitor Core Web Vitals as traffic grows
- Build off-page authority via directories & guest content

SEO Strategy

Target Keyword Focus by Page

Page	Target Keyword Focus	Intent
Home	“DreamLearn online design courses”	Branded / navigational
Courses	“online UI/UX design course for beginners”, “learn VFX online”	Commercial / high intent
Blog	“graphic design tips for beginners”, “UI vs UX difference”	Informational
About	“DreamLearn design academy”	Branded / trust-building

Technical & On-Page Roadmap

- Link Courses CTAs to real course pages
- Publish Blog posts behind article cards
- Add outbound links; fix accessibility issues

Off-Page & KPIs

- List on course directories; create social profiles
- Pursue guest-post backlink opportunities
- Track impressions, CTR, and position monthly in GSC

Content Marketing Plan

Content Pillars

Graphic Design

Beginner principles, tool comparisons, portfolio tips

Web Design

Design trends, responsive basics, redesign breakdowns

UI/UX

UI vs UX explained, case studies, beginner mistakes

VFX

Career-path guides, software overviews, showreel tips

First 8-Week Content Calendar

Wk 1-2

Graphic Design for Beginners: 7 Principles

Wk 3-4

UI vs UX: What's the Difference

Wk 5-6

5 Web Design Trends to Watch

Wk 7-8

How to Start a Career in VFX

Each post replaces one existing Blog placeholder card and cross-links to its related Courses page.

Paid Advertising & Social Media

Paid Advertising Plan

- Google Search Ads on high-intent course keywords
- Facebook/Instagram Ads for awareness — interests in design & career-change
- Suggested budget: ₹300–₹500/day, 2–4 week test window
- One course highlighted per ad, linking to its real course page

Social Media Promotion

- Instagram: design showcases, tips carousels, behind-the-scenes
- LinkedIn: career-path content for job-seekers
- Pinterest (optional): visual design content, long-tail referral traffic
- 2–3 posts/week per platform, aligned to blog publish dates

Implementation Evidence

Two audit fixes were implemented live on the site during this project:

1. New Digital Marketing Course Page

Published at /digital-marketing-course/ and linked from the Courses page — resolving the broken CTA found in the audit.

2. GA4 Analytics Tracking — Confirmed Live

GA4 property created and installed via WPCode; Realtime report confirms live traffic is being tracked (1 active user).

Conclusion

DreamLearn is technically strong and already indexed, but held back by a small number of concrete, fixable issues — broken internal links, one page-load bug, and early-stage search visibility.

- Redesign fixes remove the main barriers between existing traffic and real engagement
- SEO + content strategy builds organic visibility from a near-zero baseline
- Paid ads and social media provide faster, measurable validation of course demand
- Two fixes already implemented live: Courses page linking + GA4 tracking

Thank you.
